

protocols igmp interface <text> vif <text> query-interval

Users can set the time interval for querying.

Command Syntax

```
set protocols igmp interface <text> vif <text> query-interval <value>  
delete protocols igmp interface <text> vif <text> query-interval
```

Parameter

- <text>network interface or virtual interface
- <value> The query interval (in seconds),[1..1024]

Example

- This example is to set query interval to 4 on vlan2:

```
admin@XorPlus# set protocols igmp interface vlan2 vif vlan2 query-interval 4  
admin@XorPlus# commit
```
