

vlan vlan-id vlan-name

To create a VLAN, use the **set vlans vlan-id** command in L2/L3 configuration mode. To give a name to the VLAN, use the optional **vlan-name** keyword. To remove a VLAN, use the **delete** form of the command.

Command Syntax

```
set vlans vlan-id vlan-id [ vlan-name vlan-name ]  
delete vlans vlan-id vlan-id
```

Parameters

<i>vlan-id</i>	VLAN identifier. The range is from 1 to 4094. A range of VLAN identifiers can be specified, for example, 2,3,5-100.
<i>vlan-name</i>	VLAN name. Up to 32 alphanumeric characters in length.

Example

This example creates VLAN 10 and names it MyVLAN:

```
admin@Switch# set vlans vlan-id 10 vlan-name MyVLAN
```
