

# set protocols ovsdb ssl private-key

User can configure a private key file for ssl connected.

## Command Syntax

```
set protocols ovsdb ssl private-key <file>
```

```
delete protocols ovsdb ssl private-key
```

## Parameter

- <file> Specifies ssl connect with private key file name.

## Example

- This example demonstrates how to configure private key file name for ssl connected.

```
admin@XorPlus# set protocols ovsdb ssl private-key "/ovs/var/lib/openvswitch/pki/pica8-privkey.pem"
admin@XorPlus# commit
```
