

protocols igmp interface <text> vif <text> version

Users can configure protocol version for a specified interface.

Command Syntax

```
set protocols igmp interface <text> vif <text> version <number>
delete protocols igmp interface <text> vif <text> version
```

Parameter

- <text>network interface or virtual interface
- <number>The IGMP protocol version, [1..2]

Example

- This example is to set IGMP protocol version to 2 on vlan2:

```
admin@XorPlus# set protocols igmp interface vlan2 vif vlan2 version 2
admin@XorPlus# commit
```
