

LAG Hashing Configuration and Example

This example configures the LAG hash mapping mode as **ethernet-destination-only**.

Configuration:

```
set interface aggregate-ethernet ae1 hash-mapping mode ethernet-destination-only
```

Examples:

Configure one LAG with three ports.

```
set interface gigabit-ethernet ge-1/1/1 ether-options 802.3ad ae10
set interface gigabit-ethernet ge-1/1/2 ether-options 802.3ad ae10
set interface gigabit-ethernet ge-1/1/3 ether-options 802.3ad ae10
```

Configure the LAG hash mapping mode as **ethernet-destination-only**.

```
set interface aggregate-ethernet ae10 hash-mapping mode ethernet-destination-only
```
